Professional Summary

Front-End Developer skilled in building responsive and scalable web applications using React.js, Redux Toolkit, and TailwindCSS. Strong experience in API integration, UI optimization, and modern tooling such as Next.js, TypeScript, Vercel, and Supabase. Passionate about clean code, user experience, and delivering production-grade front-end solutions. Adept at collaborating in teams, following Git workflows, and continuously learning.

Technical Skills

Languages: JavaScript (ES6+), HTML5, CSS3
Frameworks & Libraries: typescript , React.js, Next.js, Redux Toolkit, Context API, React Query
Styling: TailwindCSS, CSS Modules, Styled Components, Bootstrap, Framer Motion
Tools & Platforms: Git, GitHub, Vercel, NPM, Vite, VS Code
APIs & State Management: REST APIs, Axios, JSON, LocalStorage
Other: Responsive Web Design, UI/UX Best Practices, Form Validation (React Hook Form + Zod)

Work Experience

Front-End Developer Trainee — DevWave Training Program

Egypt | 2025

Featured Projects

Velora — Full-Stack E-Commerce App (React + Supabase)

Live Demo | **GitHub Repo**
- Developed a full e-commerce platform with Supabase authentication and real-time database syncing.
- Built product management with image uploads, favorites, cart, and order system.
- Created an admin dashboard for managing users and products.
- Implemented form validation using React Hook Form + Zod; deployed on Vercel.

Amazon Clone — Next.js + TypeScript + Redux Toolkit

Live Demo | **GitHub Repo**
- Built core features including user authentication, cart functionality, and responsive UI.
- Contributed component architecture, state logic, and form validation.
- Collaborated with a team using GitHub workflow best practices.

Restaurant Food Ordering App

Live Demo | **GitHub Repo**
- Developed a dynamic menu with search, filters, and a persistent cart using LocalStorage.
- Integrated DummyJSON API and Google Maps functionality.
- Built responsive UI with TailwindCSS.

Gadget Guru — Graduation Project

Live Demo | **GitHub Repo**
- Created an educational electronics platform with IC database, datasheets, tutorials, and advanced search.
- Implemented a Karnaugh Map solver using the Quine–McCluskey algorithm.
- Built circuit diagram generation using React Flow.

Education

B.Sc. in Electronics & Communication Engineering
Mansoura University | 2020 – 2025
Relevant Coursework: Front-End Development, AWS Cloud Fundamentals, Machine Learning Basics
